Ready to deliver **beyond expectations.**

When we began operations in 2009, our aim was to take more people, to more places, more often. We now fly to more than 90 destinations and continue to open up new and untapped markets across the GCC & Middle East, Europe, Russia, Ukraine, Central Asia, the Subcontinent and North & East Africa. And through our interline partners, we have more than 300 destinations worldwide.

flydubai Cargo is a simple, accessible and affordable service which uses SkyChain, a fully-integrated air cargo management solution, to ensure you have accurate, up-to-date information about your shipments (through shipment tracking) from drop-off to delivery.

So why not use flydubai Cargo to get your goods to more places, more often.

We offer the following types of cargo service:

- General**
- Priority**
- Dangerous goods**
- Perishable**
- Live animals**
- Valuable**
- Courier**
- Mail**

And where necessary, based on your requirements, we use customised solutions to deliver any type of cargo to any destination on our network and beyond.

Ready to deliver with our fleet.

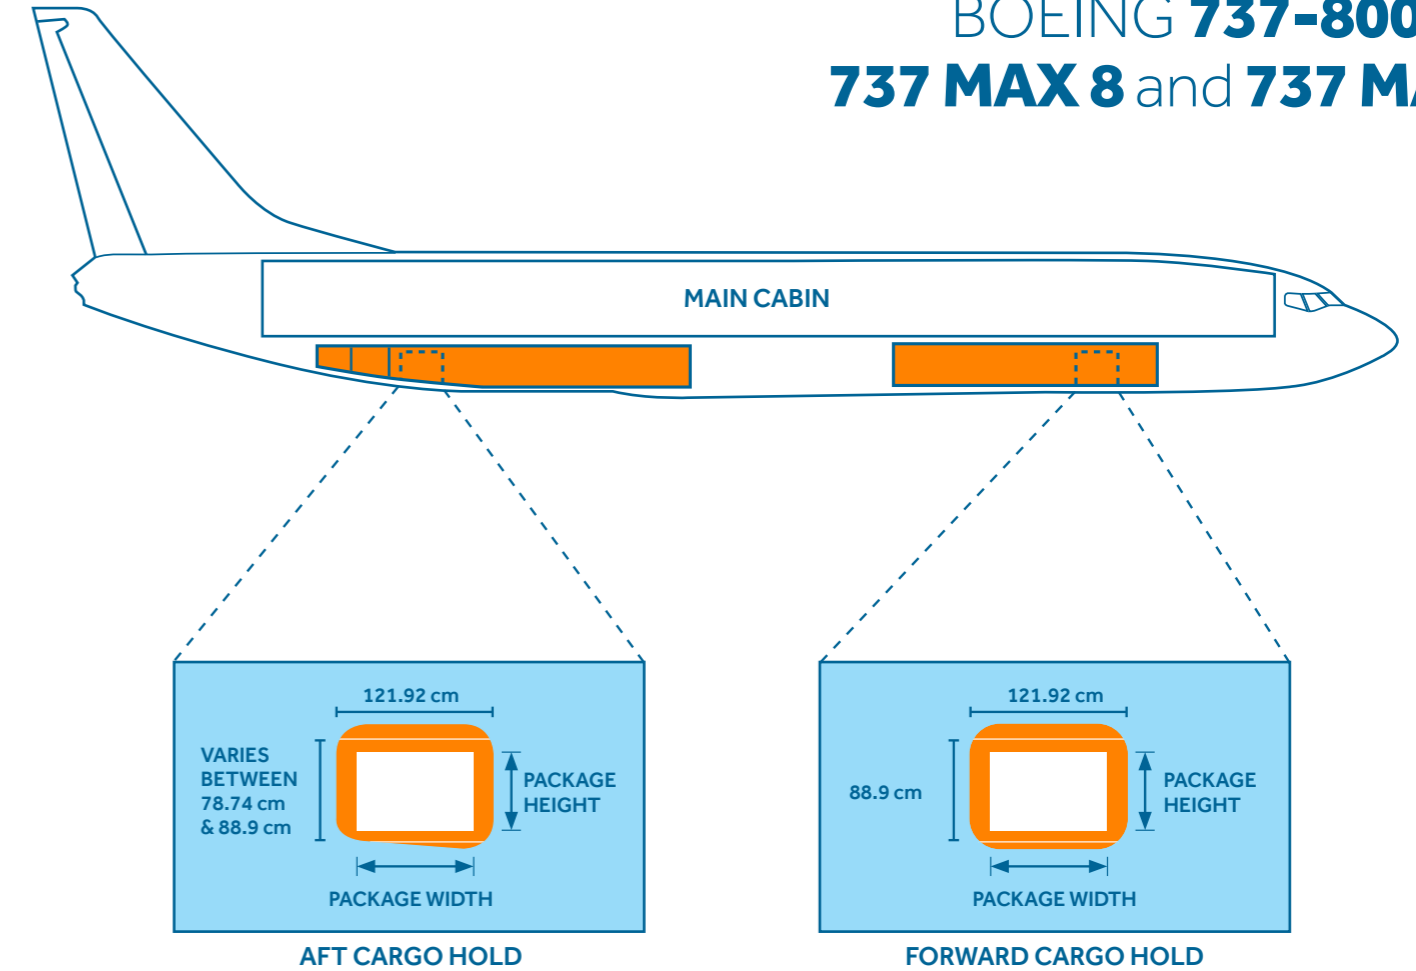

We are a young airline in every sense. Our fleet is made up of Boeing 737 MAX 8, Boeing 737 MAX 9 and Next-Generation Boeing 737-800 aircraft. So no matter what we transport, from perishables to valuables, it travels well on flydubai.

Refer to the below table for cargo compartment capacity*:

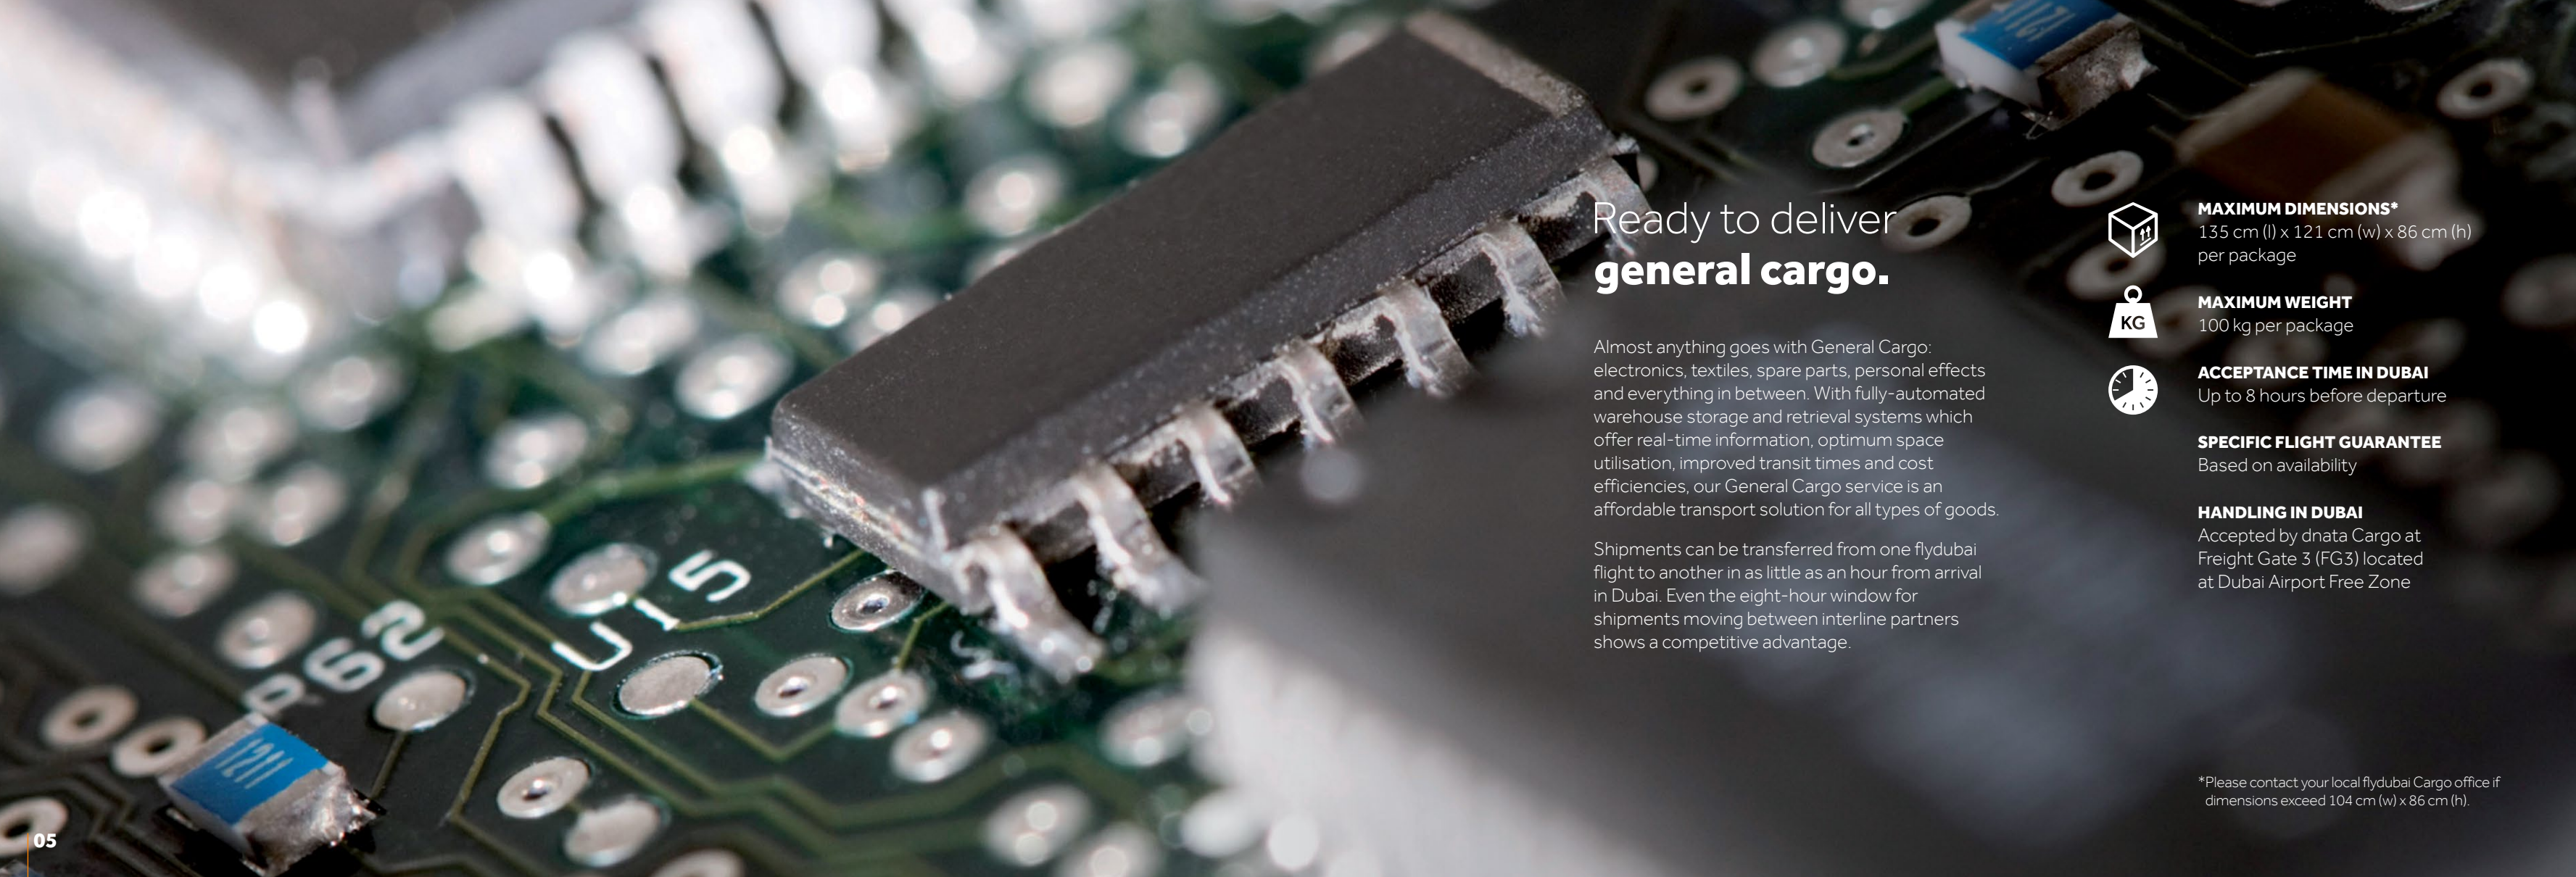

AIRCRAFT TYPE	FORWARD CARGO HOLD	AFT CARGO HOLD
Boeing 737-800	3558 kg	3631 kg
Boeing 737 MAX 8	3479 kg	4849 kg
Boeing 737 MAX 9	3559 kg	5478 kg

*Minor variation may be observed between aircraft types.

BOEING 737-800 NG, 737 MAX 8 and 737 MAX 9

Ready to deliver general cargo.

Almost anything goes with General Cargo: electronics, textiles, spare parts, personal effects and everything in between. With fully-automated warehouse storage and retrieval systems which offer real-time information, optimum space utilisation, improved transit times and cost efficiencies, our General Cargo service is an affordable transport solution for all types of goods.

Shipments can be transferred from one flydubai flight to another in as little as an hour from arrival in Dubai. Even the eight-hour window for shipments moving between interline partners shows a competitive advantage.

Ready to deliver dangerous goods.

You can now transport Dangerous Goods securely across various destinations on the flydubai Cargo Network and beyond. Our priority is to ensure the safe, efficient and careful transport of dangerous goods at all times during the process.

The transport of dangerous cargo by air is subject to national, international and the carrier's own legislation.

flydubai accepts following classes of dangerous goods*:

- Class 1:** Explosives
- Class 3:** Flammable liquids
- Class 6:** Toxic and infectious substances
- Class 7:** Radioactive Material
- Class 8:** Corrosives
- Class 9:** Miscellaneous dangerous substances and articles, including environmentally hazardous substances

*All the above classes are subject to Carrier limitations and restrictions.
